

Configuring iPhone / iPod Touch for MUSC's Exchange Server

1. From the Home screen, select "Settings" (the icon that looks like cogs to right), then "Mail" and "Add Account..."
2. Select "Other" and fill in the following:
 - a. Name:<your full name>
 - b. Address:<your MUSC email address>
 - c. Description: <Whatever you want>
 - d. Incoming Mail Server
 1. Host Name: eximap.musc.edu
 2. User Name: <your NetID>
 3. Password: <your NetID password>
 - e. Outgoing Mail Server (SMTP)
 1. Host Name: smtps.musc.edu
 2. User Name: <your NetID>
 3. Password: <your NetID password>
3. Save the account
4. Go back to the Home screen
5. Select "Settings", then select "Mail" -> your Exchange account
6. Scroll down to the bottom and select Advanced
7. Go back into the account you just created and, under "Advanced" verify the following:
 - a. Incoming Settings
 - i. Use SSL: ON
 - ii. Authentication: Password >
 - iii. IMAP Path Prefix: /
 - iv. Server Port: 993
 - b. Outgoing Settings
 - i. Use SSL: ON
 - ii. Authentication: Password >
 - iii. Server Port: 587

If you have problems connecting...

You are probably not connected to the "muscguest" network. To check your connection, select the "Safari" icon. You will be presented with the MUSC agreement page. Select "Accept" and "OK" at the bottom left of the page. Even as a member of the MUSC community, you must use the "muscguest" network when you are on campus to get your mail.
