

## Off Campus Instructions

LANVision's AccessAnywhere Installation Instructions:

1. Open the explorer browser. (Must use Internet Explorer 5.5 sp2 or higher)
2. Go to the following web site: <https://lvweb.musc.edu>
3. In the Security Alert window select "yes"
4. The install process will begin automatically
5. In the Security Warning window select "yes"
6. This will install the Java client.
7. In the Security Warning window select "install" or "Start"
8. If you get another Security Warning window click "Start"( this will happen on some PCs not all)
9. In the Java Application manager Box, click "Start"
10. The application should run. To exit, click "exit".
11. To add a shortcut to the desktop and the start menu, run explorer again, go back to <https://lvweb.musc.edu> and it should prompt you to install these shortcuts.

### **Warning:**

We have found that the installation may fail if you have a version of the Java runtime environment prior to release 1.3.1\_02 installed. Please contact your IT personnel to uninstall your previous version of the java runtime environment then try steps 1-11 above.

If you have any questions, please call Center for Computing and Information Technology (CCIT) at the Medical University of South Carolina (MUSC) helpdesk at 843-792-9700.
