

Alligator

Photos

2007-2009

A partial collection of some of my favorite photos of alligators taken during 2007 - 2009. If you would like to use any of these photos for educational purposes, please contact me and I can send you a file (in the appropriate format) for use free. For commercial uses, permission must be obtained and a fee paid.

Louis J. Guillette, Jr. is Distinguished Professor of Biology at the University of Florida and Professor of the Howard Hughes Medical Institute. He received his doctorate in Comparative Reproductive Biology from the University of Colorado @ Boulder in 1981. He is an award-winning teacher of Biology having been awarded several of University of Florida's highest faculty honors - Teacher Scholar of the Year and Distinguished Alumni Professor. He is internationally recognized for his research examining environmental contaminants as inducers of birth defects in wildlife - especially the alligator. His work has been featured in the international media (BBC, NHK, ABC, CBC, PBS). Wildlife and landscape photography is a passion with most of his work donated to educational or non-governmental environmental and health organizations. He uses Canon 30D and 50D camera bodies and his favorite lens Canon's EF 100-400mm f4.5-5.6L IS USM Telephoto Zoom Len. His web site: <http://people.biology.ufl.edu/ljg/>
